WORK EXPERIENCE

Keela (now Velora)
Senior Front-end Engineer

Apr 2023 – Present
Vancouver, Canada

Leading a critical post-merger initiative to unify front-end architecture across the first fully integrated nonprofit cloud platform (Aplos, Keela, and Raisely). Developing a cohesive Design System and custom UI component library using Radix UI and Tailwind CSS, establishing modern micro-frontend architecture with Vite and Vitest for improved modularity and team velocity. Spearheading the strategic migration of legacy products to a modern technology stack, directly improving scalability and delivering exceptional user experience. Head the frontend department, mentoring engineers and establishing best practices for TDD, documentation, and CI/CD workflows using CircleCI.

Conexiom
Senior Software Engineer

Apr 2023 – Present
Tel Aviv District, Israel

Spearheaded the design and implementation of modern micro-frontend architecture, significantly improving application speed and deployment frequency for enterprise sales order automation platform. Authored a reusable UI component library from the ground up with Storybook, establishing TDD best practices that accelerated development cycles and ensured design consistency. Championed modern front-end technologies including GraphQL and Redux, leading collaborative efforts to automate manual data entry for global enterprises with 100% accuracy.

Mrkter
Senior Front-end Web Developer

Jul 2022 – Apr 2023
Tel Aviv District, Israel

Conceptualized and led end-to-end development of an advanced online banking platform with complex financial analytics and data visualization using React.js. Established robust CI/CD pipeline and pioneered TypeScript in AWS Lambda for secure proxy server, enhancing data security and backend productivity.

Magnificode
Senior Front-end Web Developer

Jan 2021 – Jul 2022
Tel Aviv District, Israel

Led Photo Stock, Hiring Platform, and Graphic Design Tool projects using React/Next.js. Developed innovative screen ratio systems for responsive UI and mentored junior developers.

Upwork
Front-end Web Developer

Jan 2020 – May 2022
Jersey City, NJ

Achieved Top Rated Plus badge (top 3%) with 100% success rate across all contracts.
