Maksym Galchenko

EXPERIENCE

SENIOR FRONT END ENGINEER, ARK; VANCOUVER, BC — 2024-PRESENT

Driving front-end strategy and architectural decisions as part of ongoing large-scale platform migration, focusing on building scalable systems and modernizing the design system experience. Leading cross-team efforts to improve UI consistency, resolve system-level styling conflicts, and replace legacy tooling with a more maintainable, developer-friendly solution. Authoring RFCs to guide technical direction, promote shared standards, and align with long-term product goals. Delivering high-impact components and abstractions that enable reuse and accelerate development across teams. Actively contributing to improved developer experience, system reliability, and effective collaboration between engineering, design, and product stakeholders.

SENIOR SOFTWARE ENGINEER, CONEXIOM; VANCOUVER, BC — 2023-2024

I led the design and implementation of web applications and a micro frontend architecture, prioritizing software quality through Test-Driven Development and comprehensive documentation. As head of the frontend department, I provided technical direction and collaborated across teams to ensure seamless integration. At Conexiom, I played a key role in automating sales order processing for global clients, shifting workflows from manual to fully automated systems.

SENIOR FRONTEND DEVELOPER, MRKTER; TEL AVIV, ISRAEL — 2022-2023

I spearheaded the optimization of Mrkter's FinOps solution, transforming marketing expense management while simultaneously leading the development of a feature-rich online banking platform with a refined user experience using React.js. This work focuses on scalable architecture, modern UI patterns, and engineering excellence through robust software practices.

SENIOR FRONTEND DEVELOPER, MAGNIFICODE; TEL AVIV, ISRAEL — 2021-2022

I led critical projects, including a Photo Stock platform, a Hiring Platform, and a Graphic Design Tool —owning delivery from architecture to execution. I introduced an innovative screen ratio system for flawless UI, drove seamless frontend–backend integration using React/Next.js, and fostered team growth through mentorship, technical leadership, and cross-functional collaboration.

FRONTEND/FULL STACK DEVELOPER, UPWORK; WARSAW, POLAND — 2020-2022

I've achieved Upwork's Top Rated Plus badge, representing the top 3% of performers. I maintain a 100% success rate and have earned multiple 'Worker of the Month' titles by consistently delivering high-impact solutions, demonstrating ownership of complex projects, and aligning engineering work with client goals.

PROFILE | Please visit my LinkedIn or portfolio for additional experience not listed here to keep this CV concise.

EDUCATION | University of Economics and Law, Donetsk, Ukraine - Bachelor's degree, 2010 — 2014, Military and International Operational Law

SKILLS | React.js (architecture, performance), Next.js (SSR, routing, API routes), TypeScript, React Query, React Hook Form, Design systems & component libraries, Tailwind CSS, Jest & React Testing Library & Vitest, Technical documentation & RFCs, Mentoring & code reviews, Cross-functional collaboration, Frontend architecture & scalability.

CERTIFICATES | I hold 20+ certifications in modern frontend tech, teamwork, and professional effectiveness, reflecting a strong commitment to growth.
